

# The Ultimate Projection Experience

DRAGONFLY PROJECTION SCREENS

**Dragonfly™ Ultra Black ALR** projection screens transform ordinary spaces into extraordinary viewing experiences.

The star of the show is our premium Ambient Light Rejecting material that's precision-engineered to absorb excess natural light. This means you get a bright, crisp image even in lit rooms that present design challenges for traditional screens.

To ensure the highest picture quality, each ALR screen is crafted with a super-smooth surface that is optimized to deliver your favorite content in pixel-perfect 4K Ultra HD.

## FEATURES

### • VERSATILE PERFORMER

Other screens can look washed out when used in a room that has ambient light. Not only does a Dragonfly Ultra Black ALR screen perform beautifully in those environments, it also delivers sharper colors and deeper contrast for blacker blacks.

### • PREMIUM IMAGE QUALITY

These screens are engineered for **4K Ultra HD** resolution, so they're optimized to deliver a pixel-perfect performance. Your favorite movies, TV shows and presentations will have never looked better.

### • WIDE VIEWING ANGLE

Dragonfly ALR screens deliver a wide viewing angle of up to **160°**. This means that every seat in the house will still keep you on the edge of your seat.
