**Description**

This large web conferencing room is the perfect choice for an entry-level integrated video conference system. A dedicated computer makes it easy to use web chats such as Skype, Webex and GoToMeeting, while the large projector screen gives everyone a great view. Integrated table microphones and overhead speakers provide crystal-clear audio, and operation is simplified thanks to an easy to use touchscreen.

Nearus Camera
With 10x of optical zoom and 1080P image, the Nearus camera turns any standard conference room into a high quality video conference system.

Crystal-Clear Sound
Integrated table microphones and overhead speakers make sure everyone hears the conversation clearly.

Easy Integration
Need to call a third party during a video conference? The audio processor interface automatically integrates the person – just dial a number and you're ready to go.

Simple Touchscreen Operation
Touchscreen remote makes it easy to turn on the system and engage calls, providing simple operation and preventing last-minute hassles before the meeting.

Ready When You Are
A dedicated computer quickly connects to any web chat, streamlining the process and providing team member with an easy-to-use interface.

Features

- Dedicated room computer for quick connection to Skype, Lync, Cisco Jabber, GoToMeeting, etc.
- Integrated table microphones and overhead speakers for clear audio
- ClearOne telephone with a dedicated dialer
