

Binary™ USB 3.0 A-Male to A-Female Extender Cable

With data transfer rates up to 5 Gbps, integrated repeaters, and a compact 5VDC power input on their female end, these professional grade extender cables out perform anything else in their class. These powerful and durable extenders are the perfect match for Xbox Kinect, Smartboards, webcams, and more.

Need for Speed

USB 3.0 means speedy transfer rates up to 5 Gbps – which in turn means support for the latest and greatest USB devices. Just connect your devices and get fast and reliable support for external hard drives, Xbox Kinect, 1080p USB cameras, HDMI adapters, and much more

Smaller is Better

Small heads, slender repeaters, and extra-flexible material allow these extender cables to go where others can't. Even 1" conduit is no match for these bad boys that easily install in commercial applications.

Powerful Solution

Thanks to a 5VDC power input on the extender's female end, keeping USB devices juiced up and running has never been easier. Simply connect to a WattBox™ 5 Volt Power Supply (sold separately) and you'll be up and running in no time.
