BACKGROUND

Araknis 110 switch firmware version 1.0.19 complies with California's IoT security legislation. If your 110 Series switch was on a previous version of firmware, you can still log in with your previous password. If you default the switch, it uses the new default password scheme.

What Is the New Default Password?

The new default password for Araknis 110 switches is **araknis*[last 6 characters of the MAC address]*. Example:**

Username: araknis

Password: araknisA1C2B3

Where Can I Find the MAC Address?

- In OvrC.
- On the bottom of the device.
- On the product box.
