

Triad Subwoofer Wireless Transmitter

TS-WIRELESS-TX

The Triad Subwoofer Wireless Transmitter delivers a reliable, high-performance solution for integrating Triad Dual Powered Subwoofers without the limitations of long cable runs. Using a robust, point-to-point wireless connection, it provides lossless, low-latency audio transmission with interference-free operation through walls and floors up to 50 feet away. Designed for flexible installations, the transmitter supports stereo and LFE inputs, pairs with up to three subwoofers simultaneously, and ensures consistent performance for multi-room and home theater applications.

Interference-Free Operation

A proprietary adaptive frequency-hopping protocol operates within a narrow footprint in the 2.4 GHz band, enabling reliable coexistence with nearby 2.4 GHz networks and wireless protocols.

Pair Multiple Subwoofers

For setups with multiple subwoofers, the Triad Wireless Transmitter can pair with up to three subwoofers simultaneously.

Works Up to 50ft Through Walls and Floors

Whether mounted in a rack, in the same room, or in a closet in an adjacent room, the Triad Subwoofer Wireless Transmitter provides a reliable, interference-free connection to the subwoofer.
