125 lbs

# Automated MM860 Robotic Mount

## Motorized Drop Down & Swivel TV Mount

The award-winning MantelMount presents a Smart Home Ready™ motorized TV mount that automatically lowers and swivels a TV to eye level for a comfortable home theater viewing experience. It's the ideal solution for upscale installations high on a wall or over a fireplace. The MM860 Mount is a superior home automation solution that works with all popular automation control systems.

### Distinguishing features include:

- SIMULTANEOUS DROP AND SWIVEL** Patented Multi-Axis hub, proprietary software and precision electronic actuators lower and swivel the TV in one quick fluid motion.
- POWER LOSS RECOVERY** Keeps its last location in memory, eliminating the need for a reset after power interruption.
- SOFT & HARD TRAVEL STOPS** Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel.
- REMOTE CONTROL CHOICES** Controlled through the included 433 MHz RF remote, IR-based Logitech and URC remotes, and popular home automation systems.
- PLUG & PLAY NETWORKING** DHCP enabled right out of the box. Easily identifiable on the network.
- HOME AUTOMATION OPTIONS** Works with Control4, URC, RTI, Crestron, Savant, Elan and Logitech.
- ON-BOARD WEB SERVER** For simple browser-based configuration.
- ONLINE SOFTWARE UPDATES** Download the latest software and firmware updates from the internet directly to the control module.
- COMMUNICATION PROTOCOLS** Can be managed with IP via Ethernet or IR through an IRDA port.
- SILENT OPERATION** Two custom electronic actuators allow for smooth, barely audible movement.
- POST-INSTALLATION LEVELING** Allows for screen position refinement after the mount is installed.
- RECESSIBLE HOUSING** Conceals the lifting arm and electronics in the raised position. Can be recessed for flush-to-wall installations.
- HORIZONTAL BRACES WITH PAINTABLE COVERS** Make retrofitted installations fast and easy, for both recessed or surface installations.
- TEMPERATURE-SENSING MONITOR** TV automatically retracts to its home position when an unsafe temperature is detected.
- EASY TO SERVICE** The mount installs in one piece. Electronics are contained in a single lightweight module that's easily shipped, removed and replaced.
- MULTIPLE MEMORY PRESETS** Easily program multiple preset positions for favorite viewing locations.

RF Remote Included.

### MantelMount. MM860

INTERNATIONAL PATENTS PENDING

Paintable, powder-coated matte finish

Super sturdy tapered lifting arm attached to lift housing

Multi-Axis Hub

Cable Ties keep mounting environment organized

Adapters accommodate up to a 40" sound bar

### Specifications

TV Size	55" - 100"
Optimal Size	65" - 100"
Weight Capacity	125 lbs.
Mount Weight	90 lbs.
Package Weight	95 lbs.
Package Dim.	39" x 21.5" x 9.5"
UPC Code	860001148909
UMAP / MSRP	\$1,999 / \$1,999

Lifetime Limited Warranty. See FAQs at mantelmount.com for details.

All necessary hardware included.

Expert Customer Support at 1.800.897.9755 x1
