

## FIRMWARE UPDATE NOTES

### RELEASE DEATAILS

Release Date: 2020/06/15

Firmware Version:

- **OVRC-300-PRO Host Device Version:** 5.1.0.2 (Application Version: 5.0.3)
- **OVRC-100-HUB Host Device Version:** 5.1.0.4 (Application Version: 5.0.3)
- **AN-110-RT Host Device Version:** 1.0.86
- **AN-310-RT Host Device Version:** 1.0.67

**NOTE:** *To get the latest hub application on the router or hub, please reboot after updating host device fw.*

### ENHANCEMENTS

- Added OvrC third-party integration for the following Pakedge Power(PDU) product:
  - » P & PE series
- Added support for APC manufacturer's name in APC protocol.
- Increased username and password character limit to 63 characters, and now allows "&" in password fields.

### RESOLVED ISSUES

- Fixed issue for the hub scanning out the wan port on the router, as well as around default interfaces.
- Modified Control4 protocol to remove retrieval of update versions available.
- Fixed issue where Yamaha settings options would show up regardless of availability on a given Yamaha product.
- Fixed low-level software inefficiencies for Pioneer, Roku, Triad, and APC integrations.
- Fixed issue where the OvrC-100-HUB, specifically, would not recover after firmware update to a 5.X.X version of firmware.

### KNOWN ISSUES

None.
