ecobee SmartThermostats Now Available Through SnapAV

SnapAV partners gain access to consumer-favorite climate comfort solutions

CHARLOTTE, NC, April 27, 2021 – [SnapAV](#) announced today the immediate availability of [ecobee smart thermostats](#), giving every SnapAV partner access to the consumer-favorite product line and further delivering on the company’s commitment to offer the most-requested and best-in-class products to our partners.

The newly available product line includes three smart thermostat models, sensors, junction box adapters and a power extender. This lineup offers SnapAV partners a modern, intuitive, and easy-to-use solution that learns user habits to deliver enhanced comfort and cut energy costs by an average of 23 percent annually.

“Every SnapAV partner and project deserves the latest and greatest solutions, and ecobee’s smart thermostats provide class-leading climate control for standalone installations, as well as integrating with existing smart home systems, including Control4,” said **Mike Jordan, Senior Vice President of Control & Entertainment, SnapAV**. “By carrying this popular brand, SnapAV partners can now respond quickly to specific client requests with online availability and same-day pickup at SnapAV Local Pro Stores.”

“SnapAV’s wide array of product offerings are designed to make contractor setup seamless and enable amazing homeowner experiences,” said **Derrick Boyce, Executive Vice President of Sales, ecobee**. “Their network of partners allows consumers to upgrade their homes with ecobee products, while offering the same peace of mind that comes with professional installation.”

ecobee’s ENERGY STAR certified thermostats harmonize a home’s heating and cooling, delivering improved comfort and simplicity while significantly reducing energy use. The thermostats are simple to control and program through the ecobee smartphone app and

through leading smart home system interfaces, provide alerts on system health, push notifications for unexpected changes in temperature and room-specific monitoring through ecobee SmartSensors. In addition to the products' attractive on-wall appearance, learning capabilities and remote and voice control options, ecobee also offers dealers better margins than any other standalone smart thermostat.

The ecobee mobile app offers users full mobile control of their home's temperature whether they are lying in bed or on their way home from the airport. The ecobee3 lite Pro provides intelligent climate control that learns users' preferences and suggests schedule changes, while the SmartThermostat Pro with voice control adds built-in Alexa and the ecobee EMS Si Thermostat is compatible with wired sensors for monitoring temperature in walk-in fridges and freezers.

What's more, ecobee's API enables seamless integration with the Control4 system, in which case the SmartSensors can also act as room occupancy sensors for even greater simplicity and comfort.

About SnapAV

Established in 2005 and based in Charlotte, North Carolina, SnapAV is a manufacturer and exclusive source of A/V, security, control, networking, and remote management products for professional integrators. An industry leader in the pro-install channel, SnapAV helps integrators build their businesses by providing a wide range of high-quality products, easily accessible through an intuitive website and backed by award-winning service and support.
