

## PLEASE READ BEFORE INSTALLING SCREEN

- Take extra care when handling and installing the screen. Please use straps to remove the screen from the carton and make sure to handle the screen by holding the outer edges of the casing to ensure no damage is done to the trap door.
- The screen is held in place by ties inside the door during shipment to ensure no damage is done in transit. Please remove these ties prior to lowering the screen.
- Remove all caution labels after finishing the assembly work.
- Check the part list from the user manual and find all parts before throwing the cartons away.
