

ring Indoor Cam

Protection when you need it. Privacy when you want it.

1080p HD Video & Color Night Vision

Motion Alerts with Advanced Pre-Roll

Two-Way Talk

Manual Audio & Video Cover

Plug-In Power

Works with Alexa

Versatile mounting options.

With its flexible swivel mount, Indoor Cam can go basically anywhere. Find the perfect angle on a table - or mount up high on a wall or ceiling beam, then plug it into a standard outlet for nonstop power.

Privacy at your fingertips.

Turn off your camera and microphone with the manual Privacy Cover, then reactivate with a simple swivel, and control what your cameras can see or record by blacking out off-limit areas such as a bathroom door, your work desk, or a neighbor's window.

Works with Alexa

Combine Indoor Cam with Alexa for hands-free home monitoring. When anything triggers Ring's built-in motion sensors, your Echo device will illuminate and make an announcement, so you'll always know when someone's there. And if you have an Echo Show, you can also see, hear, and speak to anyone captured on camera.

Technical Specifications

Video:	1080 HD Video, Live View, Color Night Vision
Field of View:	143° Diagonal, 115° Horizontal, 59° Vertical

Frequently Asked Questions

What is the difference between Indoor Cam and Stick Up Cam?

The main difference between Indoor Cam and Stick Up Cam is where you can place them and how they receive power. Indoor Cam is an indoor-only camera that plugs into standard power outlets for nonstop power. Stick Up Cam is a versatile camera that goes almost anywhere, indoors or out. Plus, it's weather-resistant and comes in 4 different power options: battery, plug-in, solar, and Power over Ethernet.

What's the Privacy Cover and how does it work?

Indoor Cam comes with a manual, removable Privacy Cover. When you slide it in front of the camera lens, Indoor Cam's camera and microphone will turn off. When you're ready to turn Indoor Cam back on, just swivel the Privacy Cover to the side. And if you're ever unsure how you left it, you can check the status of your camera in the Ring App at any time.

What privacy features are included with Indoor Cam?

Along with the Privacy Cover, Indoor Cam also allows you to configure your privacy settings based on your current needs. Toggle motion alerts, motion, or audio recording off in the Ring App at any time. Create a motion schedule to disable motion alerts and recording during the times you're usually home. Use Modes to select a camera state with Disarmed, Home, or Away Mode (subscription required). Additionally, if you have a specific area in your home that you don't want to monitor, create Privacy Zones to black out that area to control what you want to see or record.
