

Setting Up Email Alerts

To set up email alerts for your Araknis router or Luma recorder, you need to connect to the client's email provider to allow your equipment to send messages out. This document helps you do that.

Disclaimer

This list is provided as a public service. The information herein is provided “as is” without warranty of any kind in terms of correctness, accuracy, reliability, obsolescence, or otherwise. We do not warrant, guarantee, or make any representations regarding the use, or the results of use, of this information; and we are not responsible for any damages incurred by use of this information.

Connecting to Email Servers

Each email service has different settings. Settings for major service providers are given here:

| Service | SMTP Server (outgoing mail) | Authentication | Port |
|--------------------------------|-----------------------------|----------------|------|
| AT&T | smtp.att.yahoo.com | SSL | 465 |
| BT Internet *** | mail.btinternet.com | —none— | 25 |
| Comcast | smtp.comcast.net | SSL | 465 |
| Gmail (SSL) * | smtp.gmail.com | SSL | 465 |
| Gmail (TLS) * | smtp.gmail.com | TLS | 587 |
| Hotmail | smtp.live.com | SSL | 465 |
| Office 365 ** | smtp.office365.com | StartTLS | 587 |
| Outlook | smtp.live.com | TLS | 587 |
| Verizon (basic) | outgoing.verizon.net | SSL | 465 |
| Verizon (hosted by Yahoo!) *** | outgoing.yahoo.verizon.net | —none— | 587 |
| Yahoo! Mail | smtp.mail.yahoo.com | SSL | 465 |
| Yahoo! Mail Plus | plus.smtp.mail.yahoo.com | SSL | 465 |

* Gmail Note

Please ensure that POP3 access is enabled in the account settings.

You also need to enable “less secure apps” (third party apps) in the Gmail settings; see the next page for a step-by-step guide.

** Office 365 Note

If the above settings do not work, log in to the Outlook web app, navigate to **Settings > Options > Account > My Account > Settings for POP and IMAP Access**, and make adjustments from there.

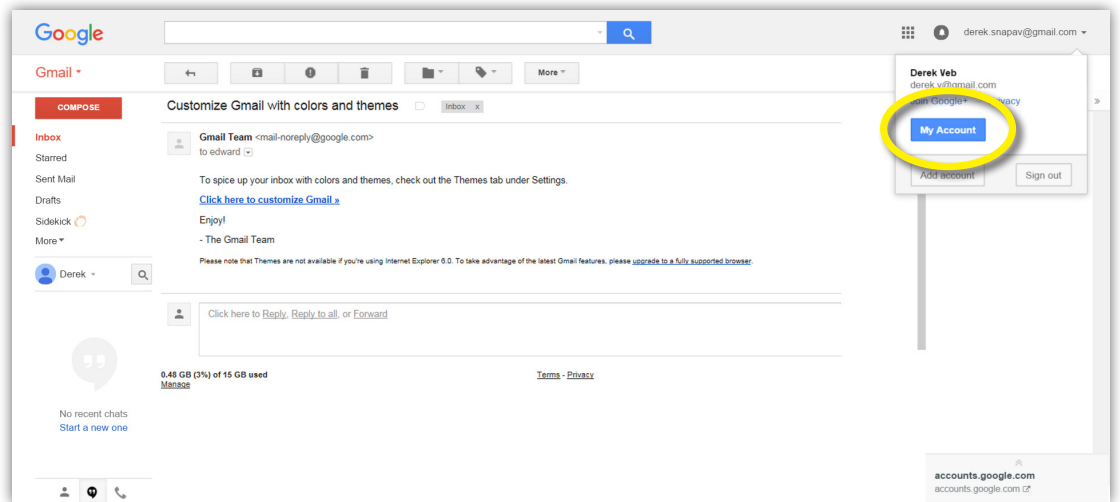

*** Authentication Note

For security reasons, we do not recommend using a server that does not use authentication.

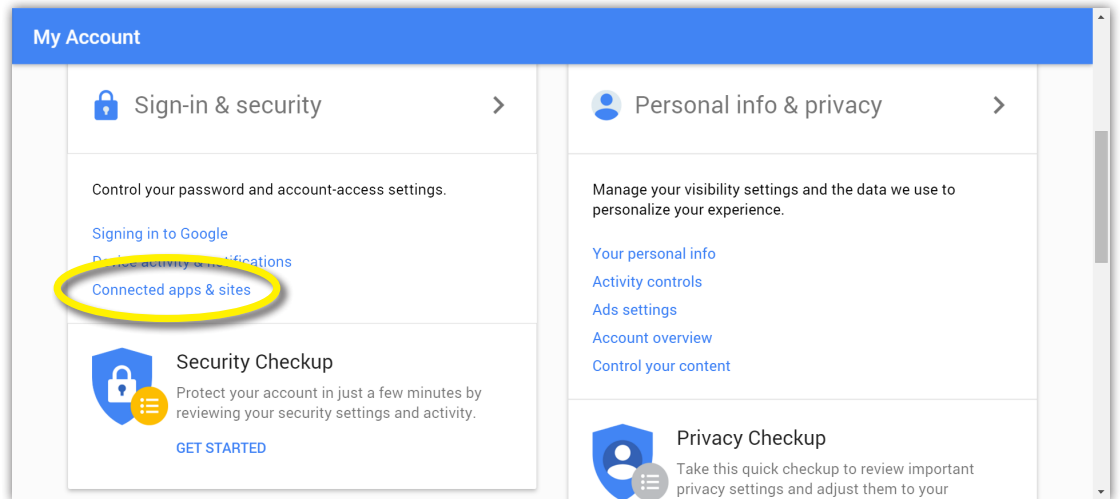

Enabling “Less Secure Apps” on Google

Go to gmail.com.

In the upper right-hand corner, click on the down arrow next to your email account, then press **My Account**.

Under **Sign-in & security**, click on the link labeled **Connected apps & sites**.

The web browser opens at a section **Connected apps & sites**. If you scroll down a little bit, you'll see a box labeled **Allow less secure apps**. Move the slider in the top right of that box to the right to switch this on.
