WPS-ACC-PTZ-CTRL Keyboard Controller • Quick Reference

Aiming Your PTZ Camera

To pan the camera up, down, left, or right, move the joystick in the appropriate direction.

To zoom the camera, causing it to narrow or widen its field of vision, rotate the joytick knob clockwise (to zoom in) or counterclockwise (to zoom out).

There is usually a small delay between moving the joystick and the camera responding. This is normal, and does not indicate a malfunction.

Keyboard Shortcuts

Below is a list of keyboard shortcuts available with this controller. Keystrokes are separated by a + sign. For example, "Set + Ent" means to press the **Set** key and then the **Ent** key (do not press them both at the same time).

The symbol [##] means to enter a numeric value.

Shortcut	Function
[##] + Cam	This selects the camera with the ID number [##].
Tele	This increases the maginifcation of the lens, zooming in for a closer view.
Wide	This decreases the maginifcation of the lens, zooming out for a wider view.
Far	Shifts the camera's focus to distant objects.
Near	Shifts the camera's focus to close objects.
Set + [##] + Preset	This saves the selected camera's present position as a preset.
[##] + Preset	This moves the selected camera to the designated preset.
Set + [##] + Pattern	This begins recording a pattern that will be saved under the designated pattern number.
Set + 0 + Pattern	This stops recording the pattern (see above) and saves it.
[##] + Pattern	This orders your camera to begin moving according to the designated pattern number.
9 + 5 + Pre	This calls the main menu of the selected camera.
