

### Overview

Wirepath Surveillance manufactures several camera models that feature a detachable wire adapter and test port that make it easier to set the camera view and menus up after the camera has been installed, but before all connections are made at the head end.

The adapters differ between camera models, so for easy reference, we have compiled the adapter types and functionality into this document. Each adapter is displayed along with the camera models it supports. Adapters can be identified by counting the number of pins on the connector that attaches to the camera.

### Adapter Types

#### 2 Pin with Video

#### Fits Models:

- WPS-300-BUL-A-GR
- WPS-300-BUL-A-WH
- WPS-350-BUL-A-GR
- WPS-350-BUL-A-WH
- WPS-350-DOM-A-BL
- WPS-350-DOM-A-WH

#### 10 Pin with Video, OSD, and Power

#### Fits Models:

- WPS-550-BUL-A-GR
- WPS-550-BUL-A-WH
- WPS-550-DOM-A-WH
- WPS-550-DOM-A-BL
- WPS-750-BUL-A-GR
- WPS-750-BUL-A-WH
- WPS-750-DOM-A-WH
- WPS-750-DOM-A-BL

**Warning!!** The Test Port adapter power connection for these cameras only uses a 12 V DC power supply. Using a 24 V AC or other voltage power supply with the Test Port Adapter will result in damage to the camera, and possibly the power supply.

## 4 Pin with Video and Power

### Fits Models:

- WPS-750-BUL-IP-GR
- WPS-750-BUL-IP-WH
