

Release Notes: Luma VMS for PC

V3.1.2 build 181122

Priority: OPTIONAL

Released: 2019/03/18

This software provides remote connectivity and management of compatible Luma recorders .

Models Affected

All Luma Series 500, 501 and 510 NVRs and DVRs as well as the Lums 310 series NVRs and DVRs.

(Does not work with Wirepath or Visualint recorders)

Enhancements

1. None - this is the first release of this software.

Issues Resolved

1. None - this is the first release of this software.

Known Issues

1. Connecting to an individual camera using the LumaLink connection method is know to return an authentication error. It is recommended to use IP/Domain connection method as a workaround.
