ATMOS LR-H

SILVER, BRONZE

Triad has designed a two-in-one speaker for Dolby Atmos®-enabled systems: the In-Room LR-H. These retrofitted speakers combine a traditional forward-firing In-Room LCR speaker and an upward-firing height module all in one compact cabinet. These custom speakers retrofit new and existing sound systems in homes where speakers are unable to mount in the ceiling. The LCR speaker delivers powerful, authentic performance through premium drivers, controlled sound reproduction, and superior audio quality. An upward-firing height module projects sound toward the ceiling, which reflects directly to the listener, delivering sound as if from above.

In an industry of generic, mass-produced products, Triad combines craftsmanship and customization in every order. Handcrafted in the US using the finest materials and components, Triad's fully engineered, sealed, and internally braced MDF enclosures deliver intricate acoustics and effortless playback, actualizing the artist's intent.

Triad's Atmos LR-H speakers offer a professional-grade cinematic experience, achieving unobtrusive elegance while retaining the integrity of sound.

Pair with Triad's In-Room Center and subwoofers for a complete Dolby Atmos®-enabled home theater.

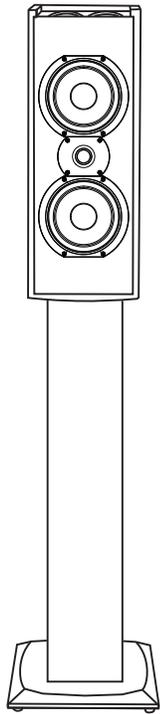

Never before has 3D sound been so simple and convenient to integrate into your home. Experience the thrill of total sound immersion as movie soundtracks take shape around you, transporting audiences beyond the theater and into the scene.

FEATURES

- Certified Dolby® Atmos™-enabled height channel
- Acoustic suspension
- Fully engineered, premium MDF enclosure
- AcoustiPerf metal grill
- 3/8"-16 threaded insert on bottom of box
- Optional pedestal
- Veneer and custom finishes available
