

EXPLORE THE SECURITY OF GOOGLE NEST

This season brings brand-new, wire-free versions of Google Nest Cam (Outdoor or indoor | Battery) and the Google Nest Doorbell (Battery), delivering security you can put anywhere and check from everywhere.[†]

That freedom has us in the mood to explore the great outdoors (and indoors) of a Google Nest home.

[†]Some features, including mobile notifications, remote control, video streaming, and video recording, require working internet and Wi-Fi.

FAMILIAR FACES

El Door-Ado

The Nest Doorbell and Nest Cam can recognize familiar faces, vehicles, and even the bark of a human's best friend.^{†‡} You can even greet guests in your doorbell's new, taller, 3:4 field of vision with built-in two-way communication through Google Nest displays or the Google Home app.

PACKAGE RECOGNITION

Package Peak

The Nest Doorbell and Nest Cam can recognize packages and send alerts to help you observe them in their natural habitat—the front door.

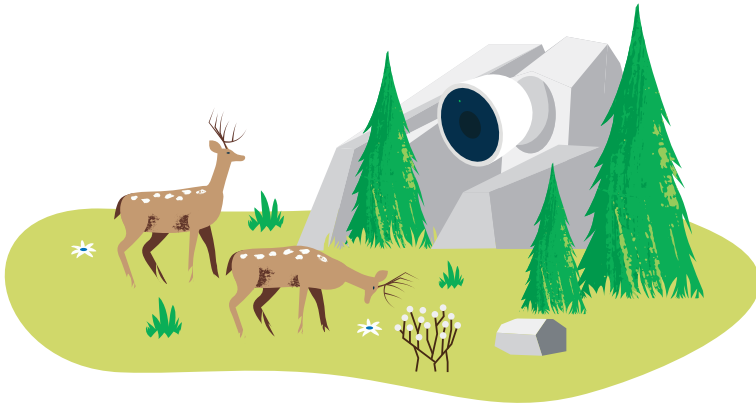

INTELLIGENT ALERTS

Howling Point

The Nest Doorbell and Nest Cam can recognize the bark of a human's best friend, so you know if it's a stranger calling or the call of the wild.

[†]Some features, including mobile notifications, remote control, video streaming, and video recording, require working internet and Wi-Fi.
[‡]Familiar face alerts require a Nest Aware subscription (sold separately). Familiar face alerts not available on cameras used in Illinois.

ACTIVITY ZONES

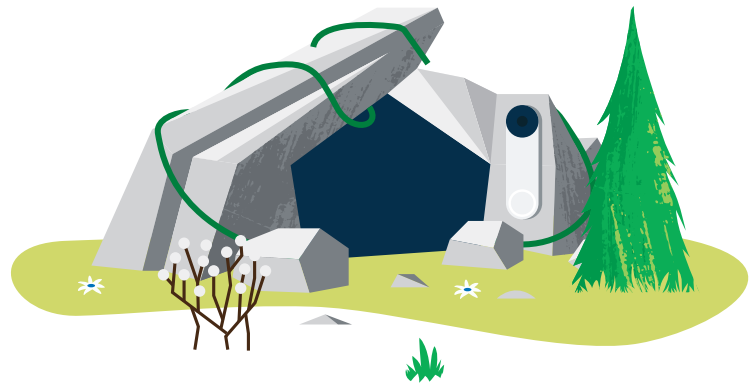

Points of Interest

By setting up to four Activity Zones, you can designate your Nest Cam to specifically notify you when something happens there.[†] And with 1 hour of local storage, you never miss a beat, even when the power and Wi-Fi are out.[°]

BATTERY POWER

Out of Bounds

Both Nest Cam and the Nest Doorbell can run on a wired power supply, or on a battery that can last up to three months on a single charge. Perfect for renters and Homeowners who don't want to deal with wiring.

NEST DISPLAYS

Scenic Overlook

The Nest Doorbell or Nest Cam now let you see more detail at more times of day with features like HDR and night vision. Plus, pairing either product with a Google Nest display helps you stay informed with Google Nest Hub's live view feed and event history.[‡]

✦ NAVIGATING WITH GOOGLE NEST ✦

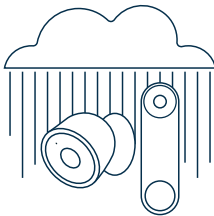

For the record

The Google Nest Doorbell (Battery) and Google Nest Cam (Outdoor or indoor | Battery) include 3 hours of free event video history^o and 10 days of continuous video recording history with a Nest Aware subscription.

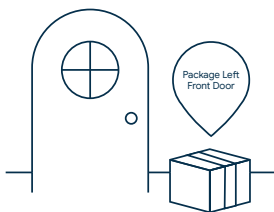

Command Central

Get setup instructions, activity alerts, and live views all in the Google Home app, or use a Google Nest Hub display to get views of—and control over—every Nest device in the house.

Adapting to environments

The Nest Doorbell and Nest Cam are rated IP56 and IP54, respectively, meaning they can hold up to outside elements without you having to worry about damaging them.

Distress calls^{ll}

Nest's home awareness devices have natural instincts for identifying specific types of activity. With a paid subscription to Nest Aware, advanced algorithms send more accurate motion and audio alerts at more intelligent times.

Mastering your domain

Google Nest displays and speakers are trained to obey commands and act as translators to your other Nest home awareness devices. To make your voice heard, just wake up your Nest with the phrase, “Hey, Google.”
